**ECONOMIC IMPACT OF INDIANA’S INLAND WATERWAYS**

In 2018, Indiana’s ports, inland waterways, and inland waterways-dependent industries supported:
- **Nearly 516,000 jobs**
- **$29.8 billion** in personal income
- **$46.5 billion** in Gross State Product
- **$108.7 billion** in total output

...Giving rise to **$3.6 billion in state & local tax revenue**

**INLAND WATERWAYS SUPPORT INDIANA’S KEY INDUSTRIES**

*Total for Agriculture, Forestry, Fishing, and Hunting sector (NAICS 11)

**TOP INLAND WATERWAYS COMMODITIES BY WEIGHT**
(Comprising 81% of total tonnage)

- **Coal, lignite, and coal coke**: 15.2 million tons
- **Sand, gravel, shells, clay, salt, & slag**: 7.7 million tons
- **Food & food products, such as fruits, vegetables, oils, & seeds**: 5.6 million tons

**TOP INLAND WATERWAYS COMMODITIES BY VALUE**
(Comprising 79% of total value)

- **Cereal grains, including wheat, corn, barley, & oats**: $873.7 million
- **Agricultural products, such as fruits, vegetables, oils, & seeds**: $790.7 million
- **Base metals, such as copper, lead, aluminum, and zinc**: $306.0 million

**INDIANA’S INLAND WATERWAY ASSETS AT A GLANCE**

- Ohio and Wabash Rivers and Great Lakes System
- 3 public ports

Indiana has **350 MILES** of navigable inland waterways, ranking it **24th in the nation**

In 2018, **35.3M tons of freight** valued at **$2.5 BILLION** moved on Indiana’s inland waterways, which is equivalent to **883,000 TRUCKS**

Avoided trucks translates into reduced congestion, emissions, and crashes, and contributes to the state of good repair of highway infrastructure.
BENEFITS OF INLAND WATERWAYS TRANSPORTATION

America’s inland waterways system is vital to our nation’s competitiveness and economic growth. The inland waterways efficiently, sustainably, cost-effectively and safely transport critical commodities like agricultural goods, energy products, building materials and industrial chemicals to destinations within the U.S. and to deep water ports for export. In 2018, 766.3 million tons of goods valued at $507.3 billion moved on the U.S. inland waterways system, and by 2045 it is expected to increase by 23% to 942 million tons valued at $871 billion. Barge transportation is the safest, most environmentally-friendly, economical, and fuel-efficient way to move our nation’s goods for use domestically and for export. On a single gallon of fuel, one barge can move freight more than four times farther than trucks, releasing 10 times fewer emissions.

Called “the backbone of the transportation logistics system,” the inland waterways are a key part of the United States’ transportation supply chain. The system includes a vast network of 12,000 miles of connecting waterways and 218 locks. However, the majority of locks and dams on the Mississippi River system were constructed during the 1930s and are operating well beyond their 50-year design life. Modernizing the nation’s inland waterways system will support and create American jobs, increase U.S. exports, and inject billions of dollars into the U.S. economy to power our growth for the next 50 years.

One standard 15-barge tow moves the equivalent volume of 216 rail cars or 1,050 trucks

The US’ inland waterways system saves between $7 billion & $9 billion annually over the cost of other modes due to efficiency and low cost
