

ECONOMIC IMPACT OF OKLAHOMA'S INLAND WATERWAYS

IN 2018, OKLAHOMA'S PORTS, INLAND WATERWAYS,
AND INLAND WATERWAYS-DEPENDENT INDUSTRIES SUPPORTED

Over **92,000 jobs**

\$8.0 billion in personal income

\$18.6 billion in Gross State Product

\$37.9 billion in total output

...Giving rise
to more than
\$1.8 billion
in state & local
tax revenue

Oklahoma has

**150
MILES**

of navigable inland
waterways, ranking it

30th in the
nation

INLAND WATERWAYS SUPPORT OKLAHOMA'S KEY INDUSTRIES

Industry Sub-Category	Percent of Goods Shipped by Water (Tons)	Direct Oklahoma Jobs
Crop production	➡ 19.7% of outbound	1,060*
Oil & gas extraction	➡ 12.9% of outbound	18,090
Chemical manufacturing	➡ 6.9% of outbound	3,550

*Total for Agriculture, Forestry, Fishing, and Hunting sector (NAICS 11)

OKLAHOMA'S INLAND WATERWAY ASSETS AT A GLANCE

Arkansas
River

2 public
ports

TOP INLAND WATERWAYS COMMODITIES BY WEIGHT (comprising 74% of total tonnage)

Food & food
products, such as
fruits, vegetables,
oils, & seeds

**2.2
million
tons**

**1.7
million
tons**

Primary
metal
products

**310,000
tons**

TOP INLAND WATERWAYS COMMODITIES BY VALUE (comprising 94% of total value)

Crude
petroleum

**\$4.7
billion**

Agricultural
products, such as
fruits, vegetables,
oils, & seeds

**\$448.3
million**

Fertilizers

**\$395.1
million**

In 2018,
5.8M tons of
freight
valued at
\$5.9 BILLION
moved on Oklahoma's
inland waterways, which
is equivalent to
144,000 TRUCKS

Avoided trucks translates into
**reduced congestion,
emissions, and crashes,**
lessening impacts on highway
infrastructure

BENEFITS OF INLAND WATERWAYS TRANSPORTATION

America's inland waterways system is vital to our nation's competitiveness and economic growth. The inland waterways efficiently, sustainably, cost-effectively and safely transport critical commodities like agricultural goods, energy products, building materials and industrial chemicals to destinations within the U.S. and to deep water ports for export. In 2018, 766.3 million tons of goods valued at \$507.3 billion moved on the U.S. inland waterways system, and by 2045 it is expected to increase by 23% to 942 million tons valued at \$871 billion. Barge transportation is the safest, most environmentally-friendly, economical, and fuel-efficient way to move our nation's goods for use domestically and for export. On a single gallon of fuel, one barge can move freight more than four times farther than trucks, releasing 10 times fewer emissions.

Called "the backbone of the transportation logistics system," the inland waterways are a key part of the United States' transportation supply chain. The system includes a vast network of 12,000 miles of connecting waterways and 218 locks. However, the majority of locks and dams on the Mississippi River system were constructed during the 1930s and are operating well beyond their 50-year design life. Modernizing the nation's inland waterways system will support and create American jobs, increase U.S. exports, and inject billions of dollars into the U.S. economy to power our growth for the next 50 years.
