

ECONOMIC IMPACT OF IOWA'S INLAND WATERWAYS

IN 2021, IOWA'S PORTS, INLAND WATERWAYS, AND INLAND WATERWAYS-DEPENDENT INDUSTRIES SUPPORTED

Nearly **88,000 jobs**

\$5.0 billion in personal income

\$9.9 billion in Gross State Product

\$31.0 billion in total output

...Giving rise to **\$349 million** in state & local tax revenue

Iowa has nearly

490 MILES

of navigable inland waterways, ranking it

19th in the nation

INLAND WATERWAYS SUPPORT IOWA'S KEY INDUSTRIES

Industry Sub-Category	Percent of Goods Shipped by Water (Tons)	Direct Iowa Jobs
Crop Production	→ 3.8% of outbound	3,370*
Food Manufacturing	→ 1.4% of outbound	23,275
Nonmetallic Mineral Product Mfg	← 9.4% of inbound	5,700

*Total for Agriculture, Forestry, Fishing, and Hunting sector (NAICS 11)

IOWA'S INLAND WATERWAY ASSETS AT A GLANCE

 Missouri and Mississippi Rivers

 **3** public ports

TOP INLAND WATERWAYS COMMODITIES BY WEIGHT (comprising 65% of total tonnage)

 **3.8 million tons**

 **1.1 million tons**

 **0.3 million tons**

TOP INLAND WATERWAYS COMMODITIES BY VALUE (comprising 85% of total value)

 **\$776 million**

 **\$338 million**

 **\$158 million**

In 2021, **8M tons of freight** valued at **\$1.5 BILLION** moved on Iowa's inland waterways, which is equivalent to over **202,000 TRUCKS**

Avoided trucks translates into **reduced congestion, emissions, and crashes**, and contributes to the state of good repair of highway infrastructure

BENEFITS OF INLAND WATERWAYS TRANSPORTATION

America's inland waterways system is vital to our nation's competitiveness and economic growth. The inland waterways efficiently, sustainably, cost-effectively and safely transport critical commodities like agricultural goods, energy products, building materials and industrial chemicals to destinations within the U.S. and to deep water ports for export. In 2021, nearly 500 million tons of goods valued at more than \$158 billion moved on the U.S. inland waterways system. The U.S. Department of Transportation Freight Analysis Framework freight forecasts suggest total water tonnage will increase at an annual growth of 0.7% per year through 2040. Barge transportation is the safest, most environmentally friendly, economical, and fuel-efficient way to move our nation's goods for use domestically and for export. On a single gallon of fuel, one barge can move freight more than four times farther than trucks, releasing 10 times fewer emissions.

Called "the backbone of the transportation logistics system," the inland waterways are a key part of the United States' transportation supply chain. The system includes a vast network of 12,000 miles of connecting waterways and 219 locks. However, the majority of locks and dams on the Mississippi River system were constructed during the 1930s and are operating well beyond their 50-year design life. Modernizing the nation's inland waterways system will support and create American jobs, increase U.S. exports, and inject billions of dollars into the U.S. economy to power our growth for the next 50 years.

Marine transportation is critical to **agricultural exports**, forecast at **\$175.5B**.

Agriculture will provide a **\$10.5B trade surplus** to the American economy, with **imports forecast at \$165 billion**. Forestry and fishery products, and critical farm inputs such as fertilizer, feed, and fuel move on the waterway system as well.

Agricultural exports are responsible for **25.5%** of **U.S. farm income**, also driving rural economic activity and supporting more than **1M American jobs** on and off the farm.
